

## HELPFUL TIPS FOR

# Streaming the Study

The Embracing Trust video Bible study is a digital product that can only be accessed online. Unlike Joanna's other studies, there isn't a DVD-version of this study.

To access the course after purchase:

- Go to [JoannaWeaverBooks.com/my-account](https://JoannaWeaverBooks.com/my-account)
- Enter email and the password that you set up after purchasing course
- Click on desired "Week" to access study materials

This study is designed to be watched via computer, tablet, mobile phone, or Smart TV with web browser function.

If you desire to project the videos onto a large TV or screen for group study, here's what you'll need:

- High-speed internet connection
- Ability to access web browser on laptop or Smart-TV (or screenshare from mobile or tablet via Apple TV).
- Recommended: Computer/laptop with necessary cables and adaptors

For best results, connect TV or projector directly to computer/laptop via HDMI cable using any necessary adapters. Wireless solutions like Apple Airplay or Google Chromecast work but don't always result in a reliable connection.

WE HIGHLY RECOMMEND working with someone experienced with online streaming who can help you set up the needed equipment and practice accessing the study a week or so before the study. Write down the steps for streaming along with Wi-Fi passwords and troubleshooting tips so that you can refer to it each week.
